

Self-Gov - Veterinary Medicine, Bd of Veterinary Medicine

Description:

The Board of Veterinary Medicine promotes the health, safety, and welfare of the people and animals of Idaho by safeguarding them against incompetent, dishonest, or unprincipled practitioners of veterinary medicine. The Board accomplishes this task by evaluating and approving veterinary students to take their national examination and evaluating the education, training, practical experience, and practice history of applicants for veterinary licensure. Once licensed, these individuals continue to be evaluated with regard to their personal and professional qualifications, as well as their efforts to keep their medical knowledge and skills current.

Veterinary Technology - The Board of Veterinary Medicine oversees the practice of veterinary technology to insure that the veterinary care provided by the veterinary technicians to the citizens of Idaho is of the highest caliber. The Board accomplishes this task by evaluating the education, training, practical experience and practice history of the applicants for veterinary technician certification. Once certified, these individuals continue to be evaluated with regard to their personal and professional qualifications and their efforts to keep their medical knowledge and skills current.

Euthanasia - The Board of Veterinary Medicine maintains a humane euthanasia and chemical capture training and certification program that provides the knowledge and understanding needed by individuals who are in the profession of providing a "good" death for ill, injured, or unwanted animals in this state.

Major Functions and Targeted Performance Standard(s) for Each Function:

1. Veterinary Medicine - Sustain an eligibility evaluation, verification and approval program for veterinary students applying to take their national examination, the North American Veterinary Licensing Examination.

- A. Supply current applications for the national examination and state licensure to all of requesting applicants within five working days. (Packets)

Actual Results			
1999	2000	2001	2002
		15	17
Projected Results			
2003	2004	2005	2006
17	17	17	17

- B. Screen, verify information and approve candidates for the national examination and state licensure within the deadlines established by the testing organization. (Candidate Approvals)

Actual Results			
1999	2000	2001	2002
		11	10
Projected Results			
2003	2004	2005	2006
10	10	10	10

- C. Provide national score reports, state examination scores and application packet status reports to the individual applicants. Scores on the national examination are to be provided within five working days following receipt of the scores from the testing organization. (Test Scores)

Actual Results			
1999	2000	2001	2002

Program Results and Effect:

The Board of Veterinary Medicine evaluates, verifies and approves veterinary applicants wishing to take their national examination, the North American Veterinary Licensing Examination, and practice in the state of Idaho. In addition, the Board of Veterinary Medicine evaluates and screens all applicants for the veterinary licensure to ensure they possess the necessary personal and professional qualifications and are competent to practice in Idaho. Once licensed, the Board continues to evaluate the veterinarians' personal and professional qualifications, as well as their medical knowledge and skill, through their license renewal and continuing education programs. The Board provides and enforces acceptable standards of practice, professional conduct, ethics, record-keeping and supervision and investigates complaints arising from noncompliance with these standards; making recommendations for improvement or taking disciplinary action when warranted. The combined result of the Board's efforts is competent and principled practitioners of veterinary medicine, who are able to provide an improved standard of veterinary care for the citizens and animals of Idaho.

Veterinary Technology - The Board of Veterinary Medicine evaluates and screens new applicants for veterinary technician certification to ensure they possess the necessary personal and professional qualifications and are competent to practice in Idaho. Once certified, the Board continues to evaluate the veterinary technicians' personal and professional qualifications, as well as their medical knowledge and skill, through their certification renewal and continuing education programs. The Board provides and enforces acceptable standards of practice and ethics, as well as appropriate supervision requirements for the veterinary procedures that are delegated to certified veterinary technicians. The Board investigates all complaints and provides suggestions for improvement or takes disciplinary action when necessary. The combined result of the Board's efforts is competent and principled practitioners of veterinary technology who can assist the veterinarians in providing quality veterinary care for the citizens of Idaho.

Euthanasia - By offering training workshops in the proper use of euthanasia and restraint drugs and equipment and a euthanasia technician and agency certification program, the Board of Veterinary Medicine provides the training and certification necessary for personnel employed by animal shelters, animal control agencies, societies for the prevention of cruelty to animals, and law enforcement agencies to obtain and administer approved euthanasia and restraint drugs. The ultimate effect of this program is the availability of a means to provide a humane death for the ill, injured, or unwanted animals in this state through the use of drugs administered by knowledgeable, trained and caring individuals.
